👤 PROFILE SUMMARY

Aspiring DevOps Engineer with experience in IT and software development spanning cloud infrastructure, automation, CI/CD, and technical support. Experienced in provisioning and managing AWS and Azure resources using Terraform and CloudFormation, building and maintaining GitLab CI/CD pipelines, and supporting Linux-based environments. Hands-on experience with Docker, Kubernetes, Bash, Python, and infrastructure automation, alongside practical AWS projects covering IAM, VPC networking, security, and cloud hosting. Strong problem-solving, troubleshooting, and stakeholder communication skills with a proven ability to learn new technologies quickly and contribute within Agile teams.

🧠 SKILLS

AWS — EC2, ECS, IAM, S3, Route53, VPC, NAT, IGW, RDS

CI/CD — GitHub, Azure DevOps

Linux

Kubernetes

Terraform

Docker

Lambda

Scripting — Bash, Python, JavaScript, HTML, CSS,

Git

📁 PROFESSIONAL EXPERIENCE

Apprentice Software Developer

09/2025 – 04/2026

Web Control (UK) Ltd

- **Developed** and **maintained** software applications under the guidance of senior engineers using **UniBasic**, **UniData** and **UniQuery**
- **Collaborated** with clients to gather requirements and deliver tailored solutions.

IT Support Specialist

01/2023 – 03/2025 | Woking, UK

Roke Manor Research

- Provisioned and maintained **AWS** and **Azure cloud** infrastructure using **Terraform** and **CloudFormation**.
- Built and maintained **GitLab CI/CD** pipelines to automate testing and deployment processes.
- Performed server administration tasks including **SSH** access, log analysis, and troubleshooting.
- Worked with **Python**, **Bash**, **JavaScript**, **HTML**, and **CSS** across development projects.

📁 PROJECTS

IAM & Cloud Security

Designed and implemented IAM policies, user groups, and role-based access controls for AWS environments. Validated permissions using IAM Policy Simulator and secured EC2 resources through policy enforcement.

Static Website Hosting

Built and deployed a static website using Amazon S3, configured bucket policies and access controls, and implemented website hosting with public endpoints.

AWS Virtual Private Cloud

Created a custom VPC from scratch including public subnets, route tables, internet gateways, and network configurations to support secure cloud infrastructure.

Network Security

Configured security groups, network ACLs, and traffic routing controls to secure cloud resources and manage inbound and outbound network traffic.

🎓 EDUCATION

Digital Skills Bootcamp – Software Development

Just IT Training Ltd

BSc Psychology & Criminology

Kingston University
